# TWENTY-NINTH ANNUAL Directory of Labor Organizations in Massachusetts, 1930

## INTRODUCTION

The matter presented herewith constitutes the Twenty-ninth Annual Directory of Labor Organizations in Massachusetts, the first directory of this character having been published in August, 1902.<sup>1</sup> Labor organizations, within the meaning of this publication, are groups of wage-earners organized for the purpose of bettering conditions of workmen through negotiations with employers, and, to this end, are usually parties to either written or verbal agreements concerning wages and conditions of employment.

The present edition consists of four divisions, as follows:

I. "National and International Organizations," having one or more affiliated local unions in the United States (pages 3-8);

II. "State and District Councils," consisting of organizations composed of delegates from local unions whose members are in trades of a like character within a definite district comprising more than a single city or town (pages 9-13);

III. "Central Labor Unions and Local Councils," composed of delegates from local unions in the same locality, not necessarily in similar trades (pages 15-20);

IV. "Local Trade Unions," composed of wage-earners in a single locality directly associated in what may be called the "unit body" of organization (pages 21-79).

At the close of December each year a general canvass is made for the data which appear in this directory. Each National and International Labor Organization known to be in existence in the United States (see Section I) is requested to furnish the Department with the name and address of its corresponding official and a list of any Massachusetts locals affiliated, together with the names and addresses of certain officials of such local unions. From the State and District Councils (see Section II) and the Central Labor Unions and Local Councils (see Section III) in Massachusetts, somewhat similar data are secured. Each local organization known to be in existence, whether or not chartered by an International or a National organization, is canvassed, and detailed information secured as to the time and place of meeting, the names and addresses of corresponding and other officials, and other relevant data (see Section IV).<sup>2</sup>

Officials of those organizations from whom no report was received in response to the original request were visited by the field agents of the Division, and the necessary data secured. There were also ascertained from various sources facts with reference to the forming of new unions and the disbanding

<sup>1</sup> Prior editions of the directory have been published in the Labor Bulletins, as follows: 1902, No. 23 and No. 24 (reprint of No. 23); 1904, No. 33; 1905, No. 37; 1906, No. 43; 1907, No. 52; 1908, No. 61; 1909, No. 68; 1910, No. 76; 1911, No. 83; 1912, No. 93; 1913, No. 94; 1914, No. 1921, No. 133; 1922, No. 136; 1923, No. 139; 1924, No. 142; 1925, No. 145; 1926, No. 148; 1927, No. 98; 1915, No. 106; 1916, No. 113; 1917, No. 119; 1918, No. 123; 1919, No. 127; 1920, No. 130; 1921, No. 133; 1922, No. 136; 1923; No. 139; 1924, No. 142; 1925, No. 145; 1926, No. 148; 1927, No. 151; 1928, No. 154; 1929, No. 157.

<sup>2</sup> The total number of organizations listed in this directory is 1,597 of which number 135 are national and international organizations, 68 State and district councils, 106 central labor unions and councils, and 1,288 local trade unions.

of those formerly active. At the time of going to press, there were incorporated in this issue any changes in officials, in the time and place of meeting, etc., which had come to the attention of the Department since the original canvass was made. Subsequent changes cannot, of course, be made in this report, but are on record where known. Officials of organizations listed herein are urged to advise the Department of any such changes as they occur. The Department makes every effort to issue the directory as early in the year as possible, as much of its usefulness depends upon the promptness with which it is issued. In this endeavor we have had the cordial co-operation of the labor officials throughout the State.

## II. STATE AND DISTRICT COUNCILS.

In the following presentation appear the names of organizations composed of delegates from local trade unions within a particular trade or group of trades, or a definite district not confined to a single locality. Delegate organizations which are strictly local bodies are included in Section III, under their respective municipalities. For convenience, the various Railway Adjustment, Protective, and Grievance Committees have been separately grouped at the end of this division of the Directory.

The following facts are given for each organization: name; business office (if any) and telephone number; time and place of next convention, conference, or meeting; names and addresses of the president, secretary (or other authorized correspondent), and business agent (if any). When no address is given for an officer named, he may be addressed at the business office or place of meeting.

## IV. LOCAL TRADE UNIONS.

The names of the local trade unions appear in the following presentation, grouped, for ready reference, by trade and occupational headings, under the respective municipalities in which they are located.

The following facts are given for each union: Name; time and place of meeting (when hour of meeting is not given, union meets at about 8 P. M. on weekdays and 2 P. M. on Sundays); name and address of secretary, business agent, or other authorized correspondent. When name of any official is given without address, he may be addressed at place of meeting.

All but a few of the local unions are affiliated with national or international bodies, these few being entirely independent of any other labor organization.

# Time Rates of Wages and Hours of Labor in Massachusetts, 1930.

## INTRODUCTION.

This report, showing rates effective July 1, 1930, constitutes the twenty-first of a series of Labor Bulletins of this nature.<sup>1</sup> In the major portion of the report, Section "A. Industries and Trades," are considered those data which relate to basic time rates and conditions of employment affecting members of labor organizations in Massachusetts as reported to the Department, on a prescribed form, by officials of the local unions. The information so secured is occasionally supplemented by data from other official sources. In the remainder of the report are presented similar data concerning employment in two types of governmental service (Section "B. Public Service") and in five branches of "Communication" (Section C). The rates herein recorded are comparable with those in prior reports of a similar nature, and, together with such rates, are indicative of the trend of wages.

The annual collection of data relating to time rates of wages and hours of labor in Massachusetts is an important function of the Division of Statistics. With minor exceptions, rates or schedules presented in this report became effective as a result of verbal or written agreements between employers and organized employees. The reporting date for the collection of this information has been fixed as July 1 in all except theatrical employment, in which the beginning of the fall contract season has been designated, the rates shown continuing in most cases for the remainder of the year. Notations are made in the form of footnotes of any known changes which occur after the reporting date, but such changes are not frequent, as it is the usual practice to renew or change agreements in the late winter or in the spring months.

In some industries, particularly the textile industry and the boot and shoe industry, the prevailing method of wage payment is on the basis of piece-work prices. These prices show such diversity and lack of uniformity that they are not here considered, but rates are given for such occupations as are on a *time* basis.

The *rates of wages* as tabulated in this bulletin should not be confounded with *actual earnings*. The former are the rates agreed upon for a specified period of time, viz., an hour, day, or week; the latter result from the number of hours worked at these specified rates. An increase in earnings is not effected simply by an increase in rates, as a scarcity or abundance of work enters largely into the matter of earnings.

The method of presentation adopted is fundamentally the same for all industries, but in certain tables, as in theatrical employment, the box headings have been changed in order to more clearly present the particular type of employment being considered. The basic units of payment for all occupations in a specified industry or trade are usually identical, that is, by the hour, day, or week. All relevant information has been shown in tabular form so far as possible, but many of the provisions of employment cannot thus be indicated, and are accordingly briefly summarized in explanatory footnotes accompanying each table.

Where overtime work is necessary, it is an almost universal practice to pay the regular straight-time rate plus a given portion of that rate. These "overtime rates" are generally shown in symbolic form, as follows: 1 T=straight time;  $1\frac{1}{4}$  T=time and one-quarter;  $1\frac{1}{2}$  T=time and one-half; 2 T=double time; 3 T=triple time.

<sup>1</sup> The first of this series of reports was issued in 1910 by the then Massachusetts Bureau of Statistics as Part I of the Forty-first Annual Report on the Statistics of Labor. Subsequent reports were issued as Labor Bulletins by that Bureau and by the Department of Labor and Industries, to which department were transferred, on December 1, 1919, certain of the functions of the former Bureau of Statistics. The Labor Bulletins were as follows: 1911, No. 91; 1912, No. 96; 1913, No. 97; 1914, No. 107; 1915, Nos. 114 and 115; 1916, No. 120; 1917, No. 124; 1918, No. 128; 1919, No. 131; 1920, No. 134; 1921, No. 137; 1922, No. 138; 1923, No. 141; 1924, No. 144; 1925, No. 147; 1926, No. 150; 1927, No. 153; 1928, No. 155; 1929, No. 158.

## A. INDUSTRIES AND TRADES.

Rates of wages, hours of labor, and other conditions of employment arrived at either by written or verbal agreements between employers and union employees in the various industries and trades, are shown in the tables under this heading.

<sup>1</sup> See note 3, page 44.<sup>2</sup> See note 4, page 44.<sup>3</sup> See note 5, page 44.<sup>4</sup> When vaudeville performances or concerts are given on Sunday in stock theatres, the rate of pay shall be the same as the prevailing vaudeville scale.<sup>5</sup> Under this heading are grouped theatres playing first class vaudeville, with motion pictures.<sup>6</sup> Two crews of six men each; one crew works from 10.00 A.M. to 5.00 P.M., and one works from 5.00 P.M. until drop of curtain of last show.<sup>7</sup> Class A theatres play four shows a day on week-days, Saturdays, and holidays, and three on Sundays. Each member of the crew works six days in seven. A "swing man" is employed to take the place of each man off and is paid one-sixth of the weekly rate of the man whose place he takes.<sup>8</sup> Class B theatres play not more than three shows a day, every day.

<sup>5</sup> Granted one day off every two weeks.

<sup>6</sup> No fixed weekly rate.

<sup>7</sup> During the period June 1 to September 30, shops close one-half hour earlier each night. During July and August shops close each Wednesday afternoon, and during the remainder of the year journeymen work until 12 o'clock noon on whichever day the half-holiday is granted.

<sup>8</sup> In addition to the regular half-holiday on account of shops closing, men are allowed four hours off each week.

<sup>9</sup> Hours vary according to locality of shop.

<sup>10</sup> For a full day's work on Saturday, \$10.

<sup>11</sup> The bonus is usually paid only when receipts exceed \$35 or \$40 a week, depending upon the shop.

## B. PUBLIC SERVICE.

*Introductory Note.* The data shown in connection with Public Service are presented in two sections, each devoted to a distinct type of service. In Federal Service the schedules cover manual workers employed in establishments in Massachusetts which are under the direction of the United States Navy and the Ordnance Department, United States Army. In Municipal Service the schedules refer to "laborers, workmen, and mechanics" who are on the pay-rolls of cities and towns in the State.

## I.

## FEDERAL SERVICE.

*United States Navy Yard and Naval Ammunition Depot.*

The rates of wages and conditions of employment shown for the employees of the United States Navy Yard, Boston, and the United States Naval Ammunition Depot, Hingham, were compiled from the "Schedule of Wages for Civil Employees under the Naval Establishments," for the calendar year 1930, issued by the Navy Department.

The overtime, Sunday, holiday, and night work rates of pay for Navy Yard and Naval Ammunition Depot employees are as follows:

"For work in excess of eight hours on the same calendar day, performed by reason of an extraordinary emergency, the schedule rate of pay, plus 50 per cent additional, shall be allowed.

"Those ordinarily employed on a seven-hour day basis who are required to work overtime in excess of eight hours on the same calendar day shall be paid for each hour of such overtime one-seventh of their schedule pay plus 50 per cent additional.

"For work on Sunday not exceeding eight hours, performed under proper authority, the schedule rate of pay, plus 50 per cent additional, shall be allowed.

"For work on legal holidays not exceeding eight hours, performed under proper authority, the schedule rate of pay, plus 50 per cent additional, shall be allowed, and, in addition thereto, gratuity pay for the legal holiday.

"For work in excess of eight hours on Sundays or legal holidays, performed by reason of an extraordinary emergency, 50 per cent additional to the Sunday or holiday rate of pay shall be allowed.

"Work performed between midnight Saturday and midnight Sunday shall be computed as Sunday work and paid for at Sunday rates.

"For work on Saturdays during the periods covered by Executive orders of May 9 and June 7, 1927, providing for certain half holidays, employees who regularly work eight hours shall receive only their schedule rate of pay for work not exceeding eight hours; employees who regularly work seven hours shall receive only their schedule rate of pay for work not exceeding seven hours.

"Employees who work regularly on Sunday shall be required to take an equal amount of time off during the week preceding or succeeding such Sunday. Employees shall rotate on Sunday work as far as practicable.

"All employees whose whole time of work or any part thereof is between the hours of 6 P.M. and 7 A.M., shall be paid 5 cents per hour in addition to their schedule rate of pay for work performed between the hours mentioned, except that no employee shall receive extra pay for night work for which he is paid Sunday, holiday, or overtime rates of pay."

*United States Armory and Arsenal.*

Employees in both the United States Armory, Springfield, and the United States Arsenal, Watertown, come within the jurisdiction of the Ordnance Department, United States Army, and the data here presented were secured directly from that Department.

The regular schedule calls for eight hours employment per day for six days, or a total of 48 hours per week, except that from the second Saturday in June to the second Saturday in September, Saturday half-holidays are granted with pay. Employees are entitled to 30 working days leave of absence during the year. This is taken as arranged by the immediate commanding officer, either by a half-holiday regularly every Saturday during other than the summer months, as at the Springfield Armory, or by a Saturday half-holiday or a full day off, as at the Watertown

Arsenal, any such time off with pay to apply against the annual leave, the balance of the leave to be taken during the summer months.

## II.

## MUNICIPAL SERVICE.

As in previous years, a questionnaire was sent to the mayors of the 39 cities and the chairmen of the boards of selectmen of the 29 largest towns in Massachusetts, requesting information regarding the rates of wages paid to "laborers, workmen and mechanics" in municipal service, as of July 1, 1930. Returns were received from the entire 68 municipalities canvassed, and there is presented herewith a tabulation of the rates of wages and hours of labor in effect on the date named.

The data in the table which follows are arranged alphabetically by municipalities (the cities in larger and the towns in smaller sized type); by departments or other similar branches of municipal service, where known; and then by occupational groups thereunder, following five general classifications, namely: Mechanics, chauffeurs and teamsters, road workers, laborers, and engineers and firemen. The occupations considered are those which come within the provisions of the General Laws of Massachusetts with reference to "laborers, workmen and mechanics," in public employment. A number of municipalities find it advisable to let out on contract certain types of construction and other work which they are either not equipped to perform or which may be performed more economically under such arrangements. Rates paid those employed on such contract work do not appear in this tabulation.

## MUNICIPAL SERVICE — Continued.

In each municipality, data with reference to the hours of labor appear in brief form after the tabulation of the established rates. Notations are also made regarding any special conditions of employment.

The maximum hours of labor in municipal employment are prescribed by the General Laws of Massachusetts (chapter one hundred and forty-nine). These laws, quotations from which appear below, become operative in whole or in part when all or certain sections thereof are accepted by the municipalities. No statement describing the action taken in this respect by the individual municipalities is here presented.

"The service of all laborers, workmen and mechanics ('... engineers shall be regarded as mechanics . . .') . . . is hereby restricted to eight hours in any one day . . . and to forty-eight hours in any one week.

"No officer of . . . any such town, no such contractor or sub-contractor or other person whose duty it is to employ, direct or control the service of such laborers, workmen or mechanics shall require or permit any such laborer, workman or mechanic to work more than eight hours in any one day, . . . or more than forty-eight hours in any one week, except in cases of extraordinary emergency.

"It shall not be a violation of section thirty or thirty-one (above extracts are quoted from these sections) if, in the event of a Saturday half-holiday being given to a laborer, workman or mechanic, his hours of labor upon other working days are increased sufficiently to make a total of forty-eight hours for his week's work.

"In any town not subject to section thirty or thirty-one nine hours shall constitute a day's work for all laborers, workmen and mechanics employed by or on behalf of such town."

In the matter of wage payments and overtime, there are several generally accepted methods of payments, as follows:

Those persons employed on an hourly basis receive pay for the actual number of hours worked.

Employees on a daily basis are paid a definite wage for each day worked, whether a full week-day or a Saturday half-holiday, but, in the case of a 44-hour weekly schedule calling for only 4 hours' employment on Saturday, the full daily wage is usually not paid for work on Saturday morning unless the employee shall have worked a given number of hours (optional with the municipality) during the first five days of the week. Employees working the full schedule therefore receive for a full week's services six times the daily wage.

In the event that the schedule calls for 48 hours' employment during the week, special daily schedules may be arranged to provide for a Saturday half-holiday without lessening the total number of hours of service required to be performed per week (see third extract quoted in the section just preceding). A schedule quite commonly adopted calls for 8½ hours for each of the first five days of the week and 4¾ hours on Saturday. The daily wage for each day worked is one-sixth of the weekly wage for 48 hours' employment. The re-arrangement of the schedule of hours to provide for a Saturday half-holiday does not affect the daily wage payable unless the employee shall have worked insufficient hours to entitle him to a full week's pay. If he has worked only part time, he receives for each hour worked one-eighth of the established daily wage.

Those employed on a weekly basis receive a stipulated sum for a given number of hours of service per week. When less than a full week is worked, a proportionate part of the weekly wage is paid.

When overtime is necessary "... in cases of extraordinary emergency," employees are paid on a special basis under regulations adopted by the governing bodies of the municipalities or under rulings of the departmental heads. If overtime should be necessary on a continuing job, not classified as an emergency, the working time of those so engaged is arranged so that the maximum hours for a week's work may not be exceeded and the regular weekly earnings are not increased because of such work. In certain classes of service a limited number of persons are employed on Sunday, and are either paid on a special basis or else the schedule of hours is arranged so that no more than 48 hours are worked in any seven days.

In the case of holidays, special rulings are made by the municipalities. Permanent employees are usually granted holidays with pay. Those actually employed on such days are paid on a special basis or allowed time off in lieu of overtime pay.

Hours of Labor.			The town of Northbridge is unique in that it does not directly employ those who perform the work ordinarily done by municipal employees. With the approval of the Board of Selectmen, one contractor, under the supervision of the Superintendent of Streets, proceeds with the necessary street, sewer, and similar work, and renders a bill to the town at stated intervals or at the conclusion of special jobs. This contractor pays his own men and their names do not appear on the town's payrolls. This arrangement differs from the usual contract in that no sum is named prior to performing the usual town work. On other than the ordinary class of work, bids are called for and contracts let, as is done in other municipalities.

## C. COMMUNICATION.

*Introductory Note.* The data set forth in connection with Communication are presented in five sections, each devoted to a specific class of service. The information in Section I has reference to those occupations which are peculiar to railroad service and which relate primarily to the operation of trains and to the maintenance of rolling stock and equipment; in Section II, railway express employees are considered; in Section III, data are given with regard to those engaged in the operation and maintenance of street railway lines; in Section IV are presented data with reference to passenger bus lines, which now have become an important factor in transportation; and in Section V, telephone employees are considered.

## I.

## STEAM RAILROAD SERVICE.

The three trunk lines operating out of Boston, namely, the Boston & Albany Railroad, the Boston & Maine Railroad, and the New York, New Haven & Hartford Railroad, in their dealings with employees concerning rates of pay, rules, and working conditions, are now governed by the provisions of the Railway Labor Act passed by the United States Congress May 11, 1926.

The Boston, Revere Beach & Lynn Railroad is not classed as a "common carrier" and therefore does not come within the scope of the Railway Labor Act above referred to. The Boston Terminal Company included in this report is organized for the purpose of taking over certain services in the South Terminal and vicinity. The Boston & Albany Railroad and the New York, New Haven & Hartford Railroad, both of which terminate in that station, pay their proportionate share for such services. This arrangement avoids duplication of effort and greatly expedites the movement of trains, freight, etc.

During the year ending July 1, 1930, the most important adjustments were upward revisions in rates of wages for those employed in the bridge and building department and in the signal maintenance service on the Boston & Maine Railroad. The rates of wages for employees of the Boston, Revere & Lynn Railroad were changed from a daily to an hourly basis for all those specified in this report.

Engine and train service employees of the three trunk lines receive compensation based on mileage covered, with certain rates of wages guaranteed. For the individual occupations in other services, where more than one rate applies, maximum and minimum rates to be paid are specified. Eight consecutive hours constitute a day's work in all crafts, and Sunday and holiday work is on a straight time basis if called for by regular assignments. Overtime in all services covered is on a pro-rata actual-minute basis. Railway shopmen are paid at the rate of time and one-half for all overtime, with a minimum of one hour's pay for any such service performed; station employees are paid straight time for the ninth hour and time and one-half thereafter; whereas, maintenance of way employees, railway shop laborers, and railroad signalmen are on straight time through the tenth hour and are then paid at the rate of time and one-half.

Motormen and guards employed in the operating departments of the Boston, Revere Beach & Lynn Railroad receive no additional compensation for overtime, while those in the mechanical and maintenance of way services are paid at the rate of time and one-half after eight hours. The employees of the Boston Terminal Company are paid at the rate of time and one-half for overtime outside of bulletin hours.

A 48-hour or 56-hour (6 or 7 day) weekly schedule depends upon the nature of the work performed. The former schedule is the one generally in effect on all four railroads named. The Boston Terminal Company male employees are on a 56-hour basis. The rates of pay and hours of labor applicable to employees of the three main lines operating out of Boston are effective over the entire systems, and not simply over those divisions which are within the confines of this Commonwealth.

<sup>1</sup> The following regulations apply to engineers and firemen employed on the three trunk lines operating out of Boston:

In all passenger service, 100 miles or less constitute a day's work. Miles in excess of 100 are paid for pro rata. On through passenger runs, overtime, at the rate of time and one-half, does not accrue until the expiration of the run, computed on a speed basis of twenty miles per hour, or until the expiration of five hours on duty. On short turn-around passenger runs, overtime is paid for all time actually on duty in excess of 8 hours within 10 consecutive hours, regardless of mileage made.

In all classes of freight service, 100 miles or less, 8 hours or less, constitute a day's work. Miles in excess of 100 are paid for pro rata. On runs of 100 miles or less, overtime, at the rate of time and one-half, does not begin until the expiration of 8 hours; on runs of over 100 miles, overtime does not begin until the time on duty exceeds the miles run, divided by 12½.

In switching service, 8 hours or less constitute a day's work. All time in excess of 8 hours is paid for at one and one-half times the hourly rate.

<sup>2</sup> This rate also applies to operators of gas rail busses on the New York, New Haven & Hartford Railroad.

<sup>3</sup> Rate per hour.

<sup>4</sup> Rates for consol engines in switching service.

<sup>5</sup> In all services, 8 hours constitute a day's work. All time in excess of 8 hours is paid for at one and one-half times the hourly rate.

<sup>1</sup> The following regulations apply to trainmen employed on the three trunk lines operating out of Boston:

In all passenger service, 150 miles or less constitute a day's work. Miles in excess of 150 are paid for pro rata. Daily rates obtain until the miles made at the mileage rates exceed the daily minimum.

On short turn-around passenger runs, trainmen are paid overtime on a pro rata basis for all time actually on duty in excess of 8 hours within 10 consecutive hours. On other passenger runs, overtime, on a pro rata basis, does not begin until the expiration of the run, computed on a speed basis of twenty miles per hour, or until the expiration of seven hours and thirty minutes on duty.

In all classes of freight service, 100 miles or less, 8 hours or less constitute a day's work. Miles in excess of 100 are paid for pro rata. On runs of 100 miles or less, overtime, at the rate of time and one-half, does not begin until the expiration of 8 hours. On runs of over 100 miles, overtime does not begin until the time on duty exceeds the miles run, divided by 12<sup>1</sup>/<sub>2</sub>.

In switching service, 8 hours or less constitute a day's work. All time in excess of 8 hours is paid for at one and one-half times the hourly rate.

<sup>2</sup> This rate also applies to operators of gas railbusses on the New York, New Haven & Hartford Railroad.

## RAILWAY EXPRESS SERVICE.

The Railway Labor Act as passed by the United States Congress May 11, 1926, applies to the Railway Express Agency, Incorporated, and its employees. Under the provisions of this Act the rates herein recorded were established and were in effect July 1, 1930. The minimum hours of labor for these employees are eight per day and forty-eight per week. Overtime is on a pro-rata actual-minute basis at the rate of time and one-half after eight hours per day.

## III.

## STREET AND ELECTRIC RAILWAY SERVICE.

The employees of street and electric railway companies are divided, broadly, into two classes, — those in the passenger service, or "blue uniform" men, and those employed in what may properly be known as construction, maintenance, and repair service. Rates of wages, hours of labor, and other conditions of employment applicable to such men are, in most instances, the result of formal agreements between the street railway line and labor organizations.

The employment of uniformed men is governed by schedules drawn up by officials of the companies. These schedules provide that a certain number of runs or trips shall be made daily, over stated routes, taking into consideration the morning and evening rush hour "peak" loads. Seniority governs the selecting of runs and the employment of the men. The daily and weekly hours of labor of other than uniformed men vary with the nature of the work performed.

The information with reference to operators of passenger busses maintained by street and electric railway companies has been enlarged upon because of the growing importance of this means of transportation.<sup>1</sup>

<sup>1</sup> Rates for bus operators employed by privately owned bus companies are presented in Table 19.

<sup>2</sup> Motormen in train service must first have served as guards for at least one year.

<sup>3</sup> Guards and motormen in train yards are selected from experienced men in train service.

<sup>4</sup> All trolley operations ceased on September 6 on Massachusetts Northeastern Street Railway Company and Middlesex and Boston Street Railway Company. Rates are given for bus operations effective that day.

<sup>5</sup> Fourth year, 61 cents; thereafter, 62 cents per hour.

## IV.

## PASSENGER BUS SERVICE.

During the past few years there has been a rapid increase in automobile bus service rendered in conjunction with or superseding street railway lines, and there are also a number of bus lines directly competing with certain railroad branch and through lines. In addition, passenger busses now operate over routes not heretofore traversed by any of the former means of transportation.

As of July 1, 1930, those companies licensed by the State Department of Public Utilities to operate in Massachusetts were requested to furnish this office with information concerning the rates of pay and scheduled hours of labor of their employees.<sup>1</sup> The excellence of the returns enables the Department to present in Table 19 data for twenty-six passenger bus companies which operate on definite schedules over stated routes. No information is presented for the "tourist" or "sight-seeing" bus companies.

## TELEPHONE SERVICE.

The data presented in this section were furnished by the New England Telephone and Telegraph Company as of July 1, 1930. The rates shown apply to clerical employees and to telephone switchboard operators within the jurisdiction of the Boston headquarters, covered by the several schedules indicated. In previous years it has been possible to show the returns for manual employees, but certain involved changes have occurred and any presentation of rates now in effect for such employees would be liable to misinterpretation, because of the fact that much of the work is of a nature peculiar to telephone service.
